Summary

During my Ph.D. research, I learned to hone my analytical skills and how to remain motivated when confronting challenges. I like to solve complex problems and love learning new skills. My education taught me how to value both independent work and team efforts. I am a creative thinker and can come up with unorthodox solutions. Moreover, I have a strong background in algorithms and data structures, especially those pertaining to scientific visualization, computer graphics, and machine learning. I believe that computer science research should strike a balance between theoretical designs and practical implementations. Hence, I am always eager to improve my knowledge about programming languages (mostly C++ and Python), object-oriented development, and state-of-the-art software engineering techniques such as build systems, design patterns, and version control systems. Striving for quality, I am easily motivated and inspired about my work.

Education

2011–...	Ph.D. in computer science, final grade 1.0 (<i>summa cum laude</i>) <i>Persistent Homology in Multivariate Data Visualization</i> Advisors: Prof. Dr. Heike Leitte , Prof. Dr. Michael Gertz
2011	Graduation , final grade 1.0 (<i>with distinction</i>)
2005–2011	Studies of mathematics and computer science at Heidelberg University , Germany
2005	Abitur ¹ , final grade 1.0 (<i>very good</i>)
1996–2005	Leibniz-Gymnasium Östringen ²

Publications

To appear	Bastian Rieck, Ulderico Fugacci, Jonas Lukasczyk, and Heike Leitte. <i>Clique Community Persistence: A Topological Visual Analysis Approach for Complex Networks</i> . To appear in IEEE Transactions on Visualization and Computer Graphics.
Under review	Bastian Rieck, Filip Sadlo, and Heike Leitte. <i>Hierarchies and Ranks for Persistence Pairs</i> . An extension of the work presented at the Workshop on Topology-Based Methods in Visualization (TopoInVis). Bastian Rieck, Filip Sadlo, and Heike Leitte. <i>Persistence Concepts for 2D Skeleton Evolution Analysis</i> . An extension of the work presented at the Workshop on Topology-Based Methods in Visualization (TopoInVis).

¹General qualification for university entrance

²Secondary school

- 2017 Bastian Rieck. *Persistent Homology in Multivariate Data Visualization*. Ph.D. thesis, Heidelberg University.
- Bastian Rieck, Filip Sadlo, and Heike Leitte. *Persistence Concepts for 2D Skeleton Evolution Analysis*. Workshop on Topology-Based Methods in Visualization (TopoInVis), Tokyo, Japan. Accepted for presentation.
- Bastian Rieck, Filip Sadlo, and Heike Leitte. *Hierarchies and Ranks for Persistence Pairs*. Workshop on Topology-Based Methods in Visualization (TopoInVis), Tokyo, Japan. Accepted for presentation. Received an **award** for the best extended abstract.
- 2016 Bastian Rieck, Heike Leitte. *'Shall I compare thee to a network?'—Visualizing the Topological Structure of Shakespeare's Plays*. Workshop on Visualization for the Digital Humanities at IEEE Vis 2016.
- Bastian Rieck, Heike Leitte. *Exploring and Comparing Clusterings of Multivariate Data Sets Using Persistent Homology*. Computer Graphics Forum, Volume 35, Issue 3, pp. 81–90.
- Jens Fangerau, Burkhard Höckendorf, Bastian Rieck, Christian Heine, Joachim Wittbrodt, and Heike Leitte. *Interactive Similarity Analysis and Error Detection in Large Tree Collections*. In: Visualization in Medicine and Life Sciences III, pp. 287–307, Springer, 2016.
- 2015 Bastian Rieck, Heike Leitte. *Comparing Dimensionality Reduction Methods Using Data Descriptor Landscapes*. Symposium on Visualization in Data Science at IEEE Vis 2015.
- Bastian Rieck, Heike Leitte. *Persistent Homology for the Evaluation of Dimensionality Reduction Schemes*. Computer Graphics Forum, Volume 34, Issue 3, pp. 431–440.
- Bastian Rieck, Heike Leitte. *Agreement Analysis of Quality Measures for Dimensionality Reduction*. Workshop on Topology-Based Methods in Visualization (TopoInVis). Also appears in: Topological Methods for Data Analysis and Visualization IV, pp. 103–117, Springer, 2017.
- 2014 Bastian Rieck, Heike Leitte. *Enhancing Comparative Model Analysis using Persistent Homology*. Workshop on Visualization for Predictive Analytics at IEEE Vis 2014.
- Bastian Rieck, Heike Leitte. *Structural Analysis of Multivariate Point Clouds using Simplicial Chains*, Computer Graphics Forum, Volume 33, Issue 8, pp. 28–37.
- 2013 Markus Forbriger, Hubert Mara, Bastian Rieck, Christoph Siart, and Olaf Wagener. *Der "Gesprengte Turm" am Heidelberger Schloss – Untersuchung eines Kulturdenkmals mithilfe hoch auflösender terrestrischer Laserscans*, Denkmalpflege in Baden-Württemberg, Nachricht-enblatt der Landesdenkmalpflege, Heft 3-2013, pp. 165–168.
- Bastian Rieck, Hubert Mara, and Susanne Krömker. *Unwrapping Highly-Detailed 3D Meshes of Rotationally Symmetric Man-Mode Objects*, ISPRS Annals of Photogrammetry, Remote Sensing and Spatial Information Sciences, Volume II-5/W1, pp. 259–264.
- 2012 Bastian Rieck, Hubert Mara, and Heike Leitte. *Multivariate Data Analysis Using Persistence-Based Filtering and Topological Signatures*, IEEE Transactions on Visualization and Computer Graphics, Volume 18, Issue 12, pp. 2382–2391.

Bastian Rieck. *Smoothness analysis of subdivision algorithms*. Master's thesis³, Heidelberg University.

Talks

A primer in VTK & Python

June 2017, Kaiserslautern University

Persistent homology for complex network analysis

June 2017, Heidelberg University

Persistent homology in multivariate data visualization

April 2017, Heidelberg University

Aspects of human perception

December 2016, Heidelberg University

*A primer in persistent homology*⁴

August 2016, Workshop on Industrial and Applied Mathematics, Hamburg

Shakespearean Social Network Analysis using Topological Methods

July 2016, Heidelberg University

An introduction to persistent homology

May 2016, Public Lecture of the Heidelberg Chapter of SIAM

Ein Bild sagt mehr als tausend Worte: Graphische Darstellungen komplexer Daten

May 2016, Akademische Mittagspause Heidelberg

Persistent homology for multivariate data visualization

February 2016, Sorbonne Universités UPMC

Aspects of human perception

June 2015, Heidelberg University

The Poincaré conjecture and the shape of the universe

May 2014, Privatgymnasium St. Leon-Rot

Persistent homology for similarity analysis

April 2014, Heidelberg University

Aspects of human perception

January 2014, Heidelberg University

C++11 programming concepts

November 2013, Heidelberg University

Weniger Klartext reden!

September 2013, Science Academy

Oh my god, it's full of data—A biased & incomplete introduction to visualization

April 2014, HGS MathComp Fellows Seminar

The Poincaré conjecture

September 2012, Science Academy

Applied algebraic topology

July 2011, Heidelberg University

³Diplomarbeit

⁴I was unable to attend the workshop due to a family emergency, but a colleague was kind enough to give my talk for me.

Thesis co-supervision

2017	Kai Sdeo <i>Visualization of Laser-Induced Fullerene Fragmentation</i>
2015	Daniel Beyer <i>Using Pathline Data Depth to Analyse Time-Dependent Vector Fields</i> Karsten Hanser <i>Visualisierung hochdimensionaler skalarer Felder mittels Graßmann-Mannigfaltigkeiten</i> Jan Greulich <i>Rekonstruktion von segmentierten Grenzsichten mittels B-Spline Fitting</i> Markus Kurz <i>Quality-based ranking of scatter plots for dimensionality reduction</i>
2013	Daniel Beyer <i>Implementierung und Parameteruntersuchung zur Transferfunktionsbestimmung für Volumendaten mittels Segmentierung des Intensität-Gradient-Histogramms</i>
2012	Alexander Eck <i>Clustering algorithms for cell cycle phase detection</i>

IT & programming skills

Strong knowledge of C++ and object-oriented programming, along with numerous well-known APIs (Boost, STL, Qt). Highly-proficient in large-scale software development and maintenance. Experienced with graphics programming APIs and toolkits (VTK, OpenGL, OpenSceneGraph).

Good knowledge of Python for data analysis purposes (numpy, scikit-learn), as well as markup languages (HTML, CSS).

Working knowledge of R, JavaScript (in particular d3.js), Perl, Java, and Haskell.

Good knowledge of digital typesetting languages (TEX, L^AT_EX).

In-depth knowledge of the Git revision control system and CMake.

Proficiency in all major operating systems (Windows, Linux, FreeBSD, MacOS X).

Professional experience

01/2015–...	Research scientist in the ‘ Visual Information Analysis ’ research group, Kaiserslautern University, Germany I am continuing my research of topology-based visualization methods, topological data analysis, and topological machine learning. My current focus lies on comparative analysis of complex networks.
10/2011–10/2014	Scholarship holder of the Heidelberg Graduate School of Mathematical and Computational Methods for the Sciences , Heidelberg University, Germany
06/2011–12/2014	Member of ‘ Computer Graphics and Visualization ’ research group, Interdisciplinary Center for Scientific Computing, Germany I developed novel techniques for understanding complex multivariate data sets. My research bridged a gap between methods from pure mathematics (algebraic topology) and computer science (visualization). I also regularly taught classes about ‘Visualization I’, ‘Visualization II’, and ‘Computational Geometry’.
01/2010–06/2011	Research assistant, ‘ Visualization and Numerical Geometry Group ’, Interdisciplinary Center

for Scientific Computing, Germany

I developed software methods for supporting the analysis of objects from cultural heritage, which ultimately resulted in a publication and multiple collaborations.

2009–2010

Teaching assistant for ‘Computer graphics I’ and ‘Computer graphics II’, [Heidelberg University](#), Germany

I helped develop a pool of exercises for OpenGL rendering. I furthermore graded exercises, held oral tutorials, and served as an examiner.

2007–2010

Student trainee for software quality management, [SAP AG](#), Germany

I found bugs in frontend software and helped refine the test suites. Later on, I assumed additional responsibilities for the virtual server infrastructure required for testing. I also developed scripts for automating some aspects of testing and installation.

2005–2007

Student worker for systems and network administration, [Heidelberg Center for American Studies](#), Germany

I co-managed workstations and servers for the employees.

Languages

German native speaker
English professional proficiency
French working knowledge
Russian elementary proficiency

Volunteer work & extracurricular activities

PROFESSIONAL MEMBERSHIPS

IEEE Computer Society, Society for Industrial and Applied Mathematics (SIAM)

CONFERENCE & JOURNAL REVIEWER

I am a regular reviewer for conferences & journals in my field. Previously, I have been reviewing for EuroVis 2012, IEEE VisWeek 2012, EuroVis 2013, IEEE Vis 2013, EuroVis 2014 Short Papers, IEEE Vis 2015, EuroVis 2016, IEEE Vis 2016, EuroVis 2017, and IEEE Vis 2017. Moreover, I have been invited to become an external reviewer for IEEE Transactions on Signal Processing and IEEE Access.

HEIDELBERG LAUREATE FORUM FILM FESTIVAL

As part of the annual Heidelberg Laureate Forum—a gathering of world-renowned computer scientists and mathematicians—I have been working with school classes & adults to discuss mathematical aspects of films.

INTERNET CONNECTIVITY FOR MY HOME TOWN

Prior to the ubiquitous availability of ADSL connections, friends and I helped improve the internet connection in my home town. By sub-contracting an internet service provider, we were able to lease a dedicated line and connect almost 200 households via a meshed wireless connection on the 5 GHz frequency band. Next to providing free technical support for the users, I was also acting as a liaison between users and the internet service provider.

COMPUTER SCIENCE COURSES AT KARLSRUHE UNIVERSITY

In 2004, I enrolled for two semesters of computer science courses as a substitute for the computer science classes at my school. This was part of the project *Schüler studieren Informatik* by [Michael Pohlig](#).

C++ PROGRAMMING COURSES

During my time in high school, I obtained permission to hold an extracurricular activity. I then taught a course on C++ programming techniques that other students could attend just like a regular school activity. This course was prompted by the lack of computer science education (at the time of my *Abitur*).

Hobbies

I am an avid reader and try to broaden my understanding of many different topics (psychology, neurology, logic, cryptography, history, to name a few). In 2006, I started a [personal blog](#) to improve my writing skills. My posts are dealing with technical subjects (computer security, software development) and I aim to explain complicated phenomena or techniques. Furthermore, I love classical music (especially from baroque times) and used to play the clarinet and the Scottish bagpipes. Recently, I discovered endurance sports. I commute regularly via bicycle and run medium distances (10 km).
